

Towards pool wall

Intermediate stud for Fanta-Sea Pools™. This 2 x 4 stud is used with our SpaceAge pool walls. Standard wood walls do not require this as wood walls are based on 4 ft. span support post. By design our SpaceAge walls require a 2 ft. span support post. This must be installed before refilling pool.

Note : At time of purchase of our SapceAge Fanta-Sea Pool™ walls you will receive this item for installation
