

SolarPRO™ CURVE

Solar Heater for In Ground & Above Ground Pools

The next generation in Solar Pool heating from GAME™

Our exclusive NEW 'curve' solar heater design creates a **MAXIMUM SOLAR** collecting area.

The most heat efficient and least flow restrictive pool heater design generating enough transfer to increase pool temperature 5 degrees in five days, extending the pool season!

Exclusive

EXCLUSIVE NEW DESIGN • MAXIMUM HEAT TRANSFER

SolarPRO CURVE Features:

- **Unique Curved Shape** – Maximizes heat absorption by capturing the sun's rays at any point during the day
- **Clear Cover** – Wraps completely around the panel to lock in heat and deflect cooling winds
- **14 Collector Tubes** – Allow for even water flow without the need for bypass kits
- **Internal Molded Baffle** – Diverts the water through the panel, allowing it pass through both sides of the collector to maximize heating potential
- **Threaded Ports** – Provide flexibility when connecting to either above ground (soft sided or rigid wall) or in ground pool

Item 4721

- Compact 43.3" x 27.2" x 5.5" (11.5" with legs assembled)
- For above ground pools up to 30' round
- Suitable for in ground pools (multiple units may be needed)
- Connect multiple units to generate more heat in less time
- Includes adapters for Intex® pools
- Durable construction with commercial grade collectors
- NSF Rated
