

The Perfect Ingredient for Salt Water Pools

Step One

Balance...

Balance the pool water as follows:

pH: 7.2 – 7.4

Total Alkalinity: 80 – 120 ppm

Calcium Hardness: 250 – 400 ppm

CYA: 40 – 80 ppm

Salt Level: Refer to generator instructions

Step Two

Add PEPPER®...

Add PEPPER directly in front of jet or broadcast over pool surface with pump running.

Initial dosage: Add 1 lb. per 10,000 gallons

Every 2 weeks: Add 1/2 lb per 10,000 gallons

Step Three

Test chlorine...

Test chlorine level after 7 days and adjust generator as needed. You will find that most generators can be operated at lower settings.
