

LIQUID SOLAR POOL COVERS

DID YOU KNOW? 70% of heat loss in swimming pools is due to water evaporation*

A liquid pool cover's main job is to reduce the amount of evaporation a pool experiences, allowing the pool to retain heat, conserve water and save energy!

[*<http://energy.gov/energysaver/articles/swimming-pool-covers>]

up to **50%** of water normally lost to evaporation can be conserved!

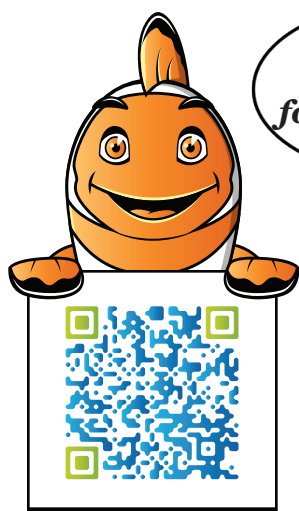

up to **50%** of overnight heat loss can be prevented!

up to **40%** on the costs of heating your swimming pool can be saved!

MONTHLY

Residential

Ecosavr™

Monthly Option for Residential Swimming Pools

Ecosavr™ replaces your conventional pool blanket. It's simple to use: just snip the fin, squeeze out any air and toss into your pool. Using Ecosavr™ is convenient and easy. With no cover to roll up or store, your pool is ready to use when you want!

WEEKLY

Residential

Heatsavr™

Weekly Option for Residential Swimming Pools

Home pool owners can now dose their pools only once a week at a rate of 4 ounces per 15,000 – 20,000 gallons of pool water. A single bottle of our product will last the average backyard swimming pool for 2 months.

DAILY

Any Pool!

Heatsavr™

Daily Dosage for Commercial OR Residential Swimming Pools

Dosing Heatsavr™ daily, with the help of an automatic metering system, is a solution for residential or commercial pools, and is guaranteed to save energy and water in every pool. The recommended dosage rate is 1 ounce per day for every 400 sq. ft. of pool surface area, or 15,000 gallons.
