

Product Description

Sometimes, pools get neglected. And sometimes, that means your pool turns into a swamp.

Swamp Treat™ is our most powerful algicide - capable of turning a swamp back into a pool in 24 hours. Add 1lb per 20,000 gallons, brush, shock, and vacuum to waste to have the worst-looking pool cleared up in no time.

It also contains Chlorine Boost™. After everything is cleaned up, you'll still have a chlorine reading - so you can save money on shock and time getting the pool ready for swimming.

It also contains no ingredients that stain, meaning you can clean the swamp in the backyard without worrying about stains down the road.

And just like all United Chemical products, Swamp Treat™ is backed by our 100% Performance Guarantee.

So turn your Swamp back into a clean, beautiful pool in no time with Swamp Treat™.

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with labeling. Always add Swamp Treat™ directly to pool or spa.

1. For swimming pools, add 1 pounds of Swamp Treat™ per 20,000 gallons by broadcasting directly onto the pool water surface.
 2. Brush pool or spa.
 3. Independent of chlorine level, immediately add liquid or dry chlorinating product for super-chlorination. Use the recommended dosage rate for super chlorination from an EPA registered chlorinating product.
 4. Before swimming, use a test kit for measuring chlorine level, as directed on your chlorinating product label. Do not enter the water or swim until the chlorine residual drops to 3 ppm.
 5. To prevent the reoccurrence of algae and maintain crystal clear water, No Mor Problems® may be used in conjunction with chlorinating and brominating products. Follow the directions for use for No Mor Problems® and maintain the chlorine or bromine level recommended on your chlorinating or brominating product.
