

Product Description

You work hard to keep your pool clean. Don't let pink algae ruin the party. Pink algae is a bacterial slime that can be very frustrating to deal with; it takes a lot of time, energy, and chemicals to get rid of it completely.

Pink Treat® is a patented algicide formulated to kill pink bacteria in swimming pools treated with chlorine and bromine. Add 2 lbs per 20,000 gallons, brush, shock, and say goodbye to pink slime in your pool. In as little as 24 hours, you can have a beautiful, clean, bacteria-free pool.

And just like all United Chemical products, it's backed by our 100% Performance Guarantee.

So get rid of the pink slime in your pool with Pink Treat®.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Always add Pink Treat® directly to pool.

TO CONTROL BLOOMS OF PINK, RED AND GREEN ALGAE, PINK AND WHITE SLIME, AND PINK AND WHITE WATER MOLD IN SWIMMING POOLS AND SPAS TREATED WITH CHLORINATING OR BROMINATING PRODUCTS:

STEP 1: For swimming pools, add 1 pound of Pink Treat® per 10,000 gallons of water. Broadcast Pink Treat® directly onto pool water surface. For spas, use the equivalent amount of 1 1/2 ounces per 500 gallons of water. Broadcast Pink Treat® directly onto spa water surface.

STEP 2: Brush pool or spa.

STEP 3: Independent of the chlorine level, immediately add liquid or dry chlorinating product for super-chlorination. Use the recommended dosage rate for super-chlorination from the label of an EPA-registered chlorine product.

STEP 4: Before swimming, use test kit for measuring the chlorine level, as directed on your chlorinating product label. Do not enter water or swim until the chlorine residual drops to 3 ppm.

STEP 5: Chlorinate continuously with tablets or a chemical feeder. Add slow dissolving tablets (such as trichloro-s-triazinetrione) during summer and heavy swimming conditions. Test chlorine with OTO (yellow chlorine test) and let stand for 5 minutes before reading.

STEP 6: To prevent reoccurrence of pink, red and green algae, pink and white

slime, and pink and white water mold, and to maintain crystal clear water, No Mor Problems® may be used in conjunction with chlorinating or brominating products. Follow the Directions for Use for No Mor Problems®. Maintain the chlorine or bromine level recommended on the chlorinating or brominating product label.
STEP 7: Repeat above steps if algae are visible in pool or spa.

Additional Information

Weight	<i>2 lbs</i>
Dimensions	<i>3.25 × 3.25 × 9.25 in</i>
Product Type	<i>Rescue Algaecide</i>
Active Ingredient	<i>Sodium Bromide</i>
Compatible Sanitizers	<i>Chlorine, Salt, Bromine</i>
Compatible Surfaces	<i>White Plaster, Color Plaster, Exposed Aggregate, Fiberglass, Painted, Vinyl</i>
Dosage	<i>2lb per 20,000 gallons.</i>
Size	<i>2 lb. Bottle, 2 lb. Bottle x 12</i>
