

KIT CONTENTS

a. Adhesive Canvas b. Tray c. Crystal Pick Up Pen d. Jelly Wax e. Coded Bags of Crystals f. Chart* g. Ziplock Bags

*Chart not included when bags are marked A-Z.

STEP BY STEP

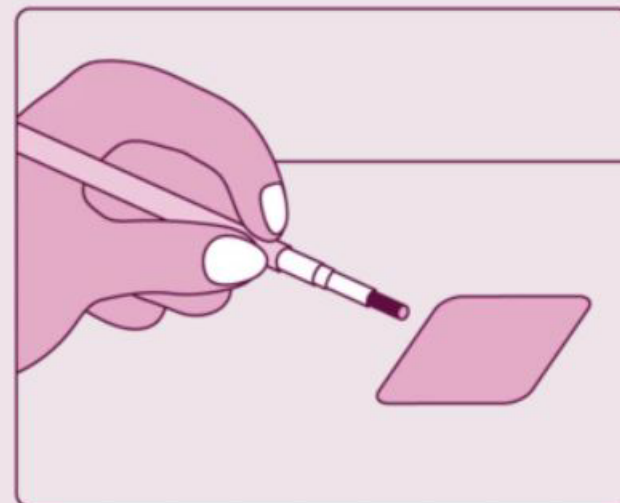

1

Each bag of crystals has a code or symbol. Find the bag you'd like to start with. The chart* shows you which number, letter or symbol to

2

the tray. The back of the crystal is flat, and this is the side that sticks to the canvas. Gently shake the tray to get as many as you can facing

3

Dab your pick up pen into the small jelly square of wax so that some wax enters the tip. You are now ready to pick up the crystals.

4

Carefully peel back the film on the canvas in the area you want to work on. Don't remove the film from the canvas entirely.

5

Use the pen to pick up the crystals in the tray and stick them to the canvas, flat side down. If a stray crystal gets onto the canvas, or if you drop a crystal into the wrong place, it can always be picked up using a pair of tweezers.

6

Continue until your design is complete, or replace the film to the canvas to save for another day. Use the included Ziplock bags to store the crystals from the tray (mark them for reference).
