

Rx CLEAR LEAK SEAL

Rx Clear Leak Seal is recommended for the repair of minor leaks and cracks in pools or spas.

DIRECTIONS FOR USE

1. Turn pump off. If available, set the filtration to “By-Pass” or “Recirculate” to avoid the product from passing through the filtration system when the pump is running. REMOVE filter grids or cartridge.
2. If the leak location is unknown, add the recommended dosage to the skimmer. If you are sure of the location of the leak, pour the recommended dosage directly into the water at the area of the leak.
3. Where possible, attach a vacuum hose with the vacuum head resting at the deepest end of pool/spa (normally by the main drain) to allow for optimum effect when the pump is turned back on.
4. After 30 minutes following application, turn pump on and allow it to run for at least 8 hours.
5. Check pool or spa to see if it still losing water. A second application may be necessary and can be made within the next 24 hours.
6. Replace filter grids or cartridges after 24 hours and resume normal filtration. Pool or spa may be entered 24 hours after application.

DOSAGE AMOUNT

	Amount of Gallons	Amount of product
POOL	10,000	20 oz.
	15,000	1 qt.
	25,000	1 qt, 20 oz.
SPA	500	1 oz.
	750	1.5 oz.
	1,000	2 oz.

IMPORTANT NOTES:

- This product should not be used when the rate of water loss exceeds 1” per day in a 15,000 gallon pool.
- One quart treats up to 15,000 gallons of water.
- This product is not suitable for vinyl pools.
- When using this product, remove automatic pool cleaners from pool.
- Do not allow this product to pass through the filtration system.
- Do not exceed recommended dosage rate.
- It is possible that fine fountain jets may block when this product is expelled.

FIRST AID

If in eyes, immediately flush with copious amounts of water for 15 minutes, holding eye lids open. Do not attempt to remove contacts unless trained. Immediately transport to medical center.

If on skin or clothing, immediately wash skin with plenty of water for 15 minutes. Bathe area with acidic liquid such as lemon juice or vinegar. If irritation develops, contact physician.

If swallowed, do not induce vomiting. Rinse mouth and drink water. Contact physician.

If inhaled, remove to fresh air. If breathing is shallow, give oxygen. Seek medical advice.
